IMPORTANT RELEASE

On Behalf of the Punxsutawney Groundhog Club Inner circle, I would like to compliment you on an amazing documentary. Each February second, Groundhog Day attracts millions of followers both on the web and at Gobblers Knob in Punxsutawney Pennsylvania. Your film not only captures the factual historical side of the event, but manages to capture the magic that seems to be a misunderstood part of the holiday.

As one of the most photographed Americans in history, Punxsutawney Phil's image has been seen and used in countless campaigns and promotions, but with this production, we now have a permanent valuable piece to chronicle our history and international impact. With over 100 years of folklore, fun and frivolity, Phil has certainly made an imprint on American folklore. This film perfectly captures the magical day, quaint town and furry forecaster.

Every day we answer endless questions about the holiday and history of Groundhog Day. People simply want to know more about Punxsutawney Phil. With this documentary the world will have their questions answered in a unique, timeless and entertaining way. There are thousands of products with and about Phil, but your film is important as it clearly communicates the message, the mystery and the mayhem succinctly and with a professional handling. With industry requests from media, tourism and travel companies, this film is the perfect addition to new and existing media and tourism campaigns and initiatives because it tells the story that so many people want to hear.

This film is simply put: GREAT! I've been involved with Groundhog Day for over 20 years and finally we have documentary that sums it all up and answers the question: Why is Groundhog Day America's Second Favorite Holiday!
